Projects / Activity

VyaPyaarAI - Your one stop business guide July 2025

- VyaPyaarAI is an intelligent assistant designed to help first-time entrepreneurs and small-town sellers start, scale, and sustain their e-commerce journey with confidence. It simplifies the process of going online by offering AI-powered mentorship, platform recommendations, automated product listing, and sustainability insights — all tailored to the seller's region, demand trends, and business stage.
- It uses advanced natural language models (like Gemini) and contextual market data to provide personalized business suggestions, sustainable product ideas, and strategic pricing tools.

Movie Recommendation System July 2024

- Developed a dynamic movie recommendation platform using React.js, HTML, CSS, and MySQL for backend data management. Enabled users to browse/search movies by genre, rating, release year, and personalized suggestions.
- Implemented content-based filtering to improve recommendation accuracy, enhancing user experience and reducing time spent in finding suitable movies.

Cloud Kitchen July 2023

- Built an interactive recipe discovery platform using HTML, CSS, JavaScript, and Bootstrap to offer seamless navigation and responsive design.
- Integrated step-by-step cooking instructions and categorized dishes using a MySQL database, targeting beginners with a clear, guided cooking experience.

Certifications

- Full Stack Web Development [Udemy]
- HTML, CSS, and JS for Web Developers Certificate[Coursera]
- Bug Bonanza coding - HackerRank

Achievements
